

Adding Antidote 71 to Your LinkedIn Company Page

Your Account Executive will send a connection request to you (or whomever you designated as admin of your company page) on LinkedIn. They must be connected to an admin to be added to the page.

Once that is complete:

1. Click on your profile icon and navigate to your company page.
2. Click "Admin Tools" in the upper right.
3. Choose "Manage Admins" from the dropdown.
4. Click "Add Admin."
5. Start typing your Account Executive's name (likely the one who sent you this) as they will be the primary connection for LinkedIn.
6. Once you find them and select them, choose "Super Admin."
7. Click "Save."

Your Account Executive will now be able to manage your LinkedIn connections to our social media software and any other integrations you need, and add the necessary people on our team to your account as Editors.
